

# ROCKETSHIP RUN

## **PUMPKIN CARVING INSTRUCTIONS (WITH THE HELP OF A GROWNUP):**

1. Print the stencil.
2. Ask your parent to help you hollow out the pumpkin. Make sure it's big enough to fit the stencil!
3. Carefully cut out the stencil using scissors.
4. Tape the stencil to the pumpkin.
5. Ask your parent to help you use a poking tool or toothpick to outline the design by poking along the dotted line edges of the stencil.
6. Once the design is outlined, ask your parent to use a small knife to help you carve.
7. Work together to carve out the white sections. For the gray sections, just scrape off the skin so light can shine through, but don't cut all the way through the pumpkin. Always have an adult helping you with this part!
